

NEC Group COVID-19 Risk Assessment

Updated 27.07.21

Introduction

This document has been put together to summarise the health and safety measures which have or will be taken by the NEC Group in order to protect people from the risks of Covid-19. It has been simplified for ease of use, but a full risk assessment is available if requested. This document should be read in conjunction with our Venue Protect documentation that has been created for each venue. The NEC Group will follow guidance provided by the UK Government and various industry bodies, including National Arenas Association, the Meeting Industry Association, Association of Event Venues and Association of Event Organisers. This risk assessment applies to all NEC Group venues. We have a general duty to manage risks to people's health and safety so are continuing to take precautions to protect our staff and all of our visitors.

Risk Assessment considerations

It is assumed that the people who could be harmed will be any person who could come in to any of our venues, whether these are our own staff, members of the public, exhibitors, artists, contractors, suppliers or anyone else who has a legitimate reason to be there. The hazard (the thing which could cause injury or illness) is assumed to be the contracting of Covid-19. Overall, with all control measures in place, it is felt that the likelihood of contracting the disease is low, but the severity has the potential to be high.

Control measures

Listed below are the steps being taken to protect people.

	Hand washing Good hand washing techniques to be encouraged with additional signage in toilet areas, as the prime means of preventing transmission. Toilets will have sufficient amounts of hand cleaning and drying facilities.
	Sanitising Additional hand sanitiser stations have been put in place in specific communal areas. Signage in place to remind people about sanitising their hands, especially on entrance to the buildings.
	Cleaning Additional cleaning resources have been put in place to continually clean high touch points and in public spaces. Toilets will be cleaned regularly. Any concerns can be raised with any member of staff and additional cleaning will be organised. Exhibitors will be encouraged to clean their stands regularly throughout an event. Waste will be removed more frequently during events.

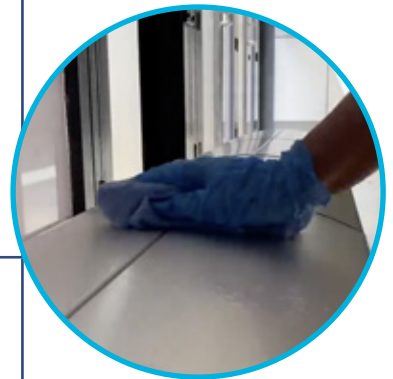

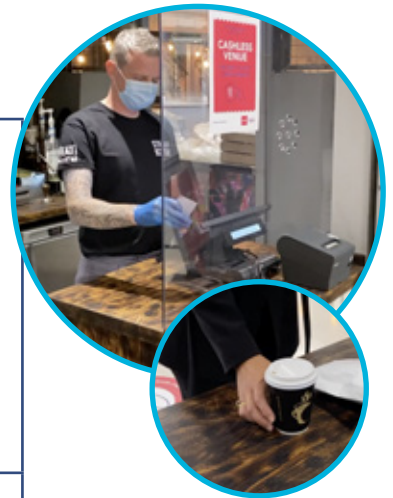

NEC Group COVID-19 Risk Assessment

Control measures *continued.*

	<p>Food Safety</p> <p>We will maintain our usual 5 star high standards of food safety compliance. Additional precautions will be taken, dependent on the arrangements within the specific Operational Plan produced for each venue. Food and beverage will be integrated into one-way lanes with grab and go provision. Food is likely to be pre-packaged and not buffet style. Payment will be contactless only. Staff will be wearing PPE in line with their job role and proximity to the public.</p>
	<p>Seating</p> <p>Some seating will be removed or taken out of action to encourage distancing. It is likely that public area communal seating will not be fully available. Where any seating is still in place, it will be cleaned regularly. Conference and event related break out seating may be available, dependent on the Event Organiser's arrangements. This will also be cleaned regularly.</p>
	<p>Venue ingress and egress</p> <p>Venue ingress and egress will be controlled as much as possible, to avoid queueing and crowding. Events may choose to operate with staggered arrival and departure arrival times, to help manage visitor flow and density. Social distancing measures will be in place in certain areas with circulation paths mapped out for attendees to follow. Tickets and pre-event information are likely to indicate the best place to enter the building, and members of the public will be directed to these entrances.</p>
	<p>Venue operation</p> <p>All staff and visitors will be advised to maintain social distancing from other visitors where possible.</p>

NEC Group COVID-19 Risk Assessment

Control measures *continued.*

	<p>Pre-registration</p> <p>All events and conferences, whether trade, consumer or public, will have a pre-registration or ticketing process to ensure that audiences are known, although some will allow walk up sales. Touch points will be minimised throughout the customer journey. Tickets are likely to be primarily e-tickets, to avoid points of contact, or print at home tickets/badges.</p>
	<p>First Aid provision</p> <p>First Aiders will be available on every site. These staff are aware of government and industry bodies guidance on emergency life safety protocols. Any person reporting symptoms will be held in place if possible, unless this is likely to cause concern amongst other members of the public. First aiders will be provided with appropriate PPE. People who are well enough will be encouraged to go home immediately and make contact with their GP or the 111 service. Additional cleaning will take place in the area of any first aid treatment.</p>
	<p>Car Parking</p> <p>Car parking will be pre-pay or paid for online when at the venue, to reduce the need to touch machines. No cash will be taken for parking. Designated walking routes will be signposted from car park to venue. For the Arenas, the Vox and the NEC, you are likely to be directed to a specific car park on approach to the venue, which will be as close as possible to your entry point to the venue. For the ICC, follow normal wayfinding signage to access the public mall. Payment machines will be cleaned regularly throughout the day.</p>

Control measures *continued.*

	<p>Personal Protective Equipment (PPE)</p> <p>Appropriate Personal Protective Equipment will be worn by relevant employees based on their role and responsibilities and in adherence with health and government guidance. Training on how to properly use and dispose of all PPE will be mandatory. All employees will complete training before they return to work and daily/pre shift briefings will reinforce key messaging. Best practice briefing documents outlining the latest expert advice will be made available via the staff intranet platforms.</p> <p>It is not currently a legal requirement for members of the public attending an exhibition or conference to wear a face covering whilst in attendance but we would strongly encourage that attendees still continue to wear a mask whilst inside our venues and on our shuttle buses. This may also be a requirement of the relevant event organiser. For future events and other types of activities, such as concerts, the requirements will be clearly communicated before attendance at the event. All staff (except for those exempt) should wear face masks when inside a venue, unless sitting at a desk, eating or drinking.</p> <p>Front line staff have been trained to be aware of the impact that a face covering may have on their ability to communicate. If they recognise that a person may have difficulty understanding their advice or responses, they will remove their face covering whilst maintaining social distancing recommendations, to continue the conversation. Additional digital and physical signage will also be present to assist our visitors.</p>
	<p>Signage</p> <p>NEC Group venues have highly visible digital screens situated in key locations across sites. These devices offer great exposure to audiences and will carry clear and impactful social distancing messages as a constant reminder to all on site. Communications will be issued to visitors prior to arriving and advising them of the new protocols; this content will also be displayed on all NEC Group websites.</p>
	<p>Cloak rooms/luggage rooms</p> <p>Cloak rooms may not be in operation, so please check before leaving for your event. Restrictions may be introduced on luggage allowed into venues. Arena events will only allow an A4 sized bag to be brought in. Where they are in operation, coats will be deposited into a bag, prior to being held.</p>

NEC Group COVID-19 Risk Assessment

Control measures *continued.*

	<p>Staff precautions</p> <p>A team specific Risk Assessment will be completed by each manager (or next senior manager if the team manager is on furlough) before staff return to work, including consideration of all control measures relevant to the work of that team. All staff will have to complete Covid19 return to work training.</p>
	<p>Contractors</p> <p>NEC direct contractors will be asked to provide risk assessments for their work, which includes reference to how they will control Covid-19 risks. Where contractors are engaged by event organisers or promoters, we expect that this will also take place. They will maintain social distancing from members of the public as much as possible. Work will be planned for times when the least people will be in that area. Contractor inductions will include reminders about social distancing and hygiene measures. Organisers of events should hold sufficient details of contractors and sub-contractors involved in their event to support tracing processes if required. We expect contractors to also wear face masks while working inside our venues, unless their work requires a more specific form of PPE to be worn.</p>
	<p>Air conditioning</p> <p>F7 Grade filters have been fitted to our air conditioning systems. The Heating, Ventilation and Air Conditioning (HVAC) system has been supplemented to increase air turnovers. We have conducted a ventilation survey across all of our main buildings and will adjust our capacities accordingly. Where this has not been possible we will carry out specific risk assessments.</p>
	<p>Emergency procedures</p> <p>We will be following our expected emergency protocols if required. If a fire alarm does occur, we will encourage staff to maintain social distancing throughout, if possible, without impacting on speed of egress.</p>

NEC Group COVID-19 Risk Assessment

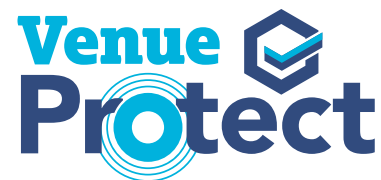

Control measures *continued.*

	<p>Conference Rooms</p> <p>Rooms will be cleaned each day. Lay out will aid communication but minimise likelihood of transmission. Items will be removed from conference and meeting rooms, such as stationary and hand held microphones. All technical equipment will be sanitised after each session, as well as at the end of each day.</p>
	<p>Set up and break down of events</p> <p>Contractors will be expected to have included Covid-19 in their risk assessments and to adhere to industry standards at all times. Expectations will be reviewed through meetings between organisers/promoters, contractors and venue staff. Organisers will also be expected to have included their Covid controls within their own risk assessments.</p>
	<p>Shuttle Buses</p> <p>Shuttle buses may be in operation for the NEC venue. There will be a limited capacity on the bus. Masks should be worn, in line with legal requirements. As always, a walking route will also be available.</p>
	<p>Contact Tracing</p> <p>Through the use of organiser's data, ticket sale information, registration, mobile apps and other sources, we may provide assistance to the proper authorities in the event of a need to trace attendants at one of our events, in line with data privacy agreements. Relevant data will only be kept for 21 days, in line with government advice. This will also apply to contractors who may have been engaged by us. Where they are under the control of an organiser or a production team, a relevant contact will be passed on if required.</p>

NEC Group COVID-19 Risk Assessment

Control measures continued.

	<p>Testing</p> <p>NEC Group staff are strongly encouraged to test twice weekly, in line with government recommendations. To enter any event it is likely that you will need to show an NHS Covid Pass, showing that you are fully vaccinated or have had a negative test result within the last 72 hours. Random checks will be undertaken to confirm this. Your vaccination card is not sufficient evidence, so you must be able to show this on an NHS app or in writing from the NHS. Exhibitors, contractors or production crew may have additional requirements imposed on them.</p>
	<p>Industry and government requirements</p> <p>The current guidance from government and industry sources will be monitored to ensure that this document and other NEC Group procedures and advice are up to date. NEC Group staff sit on relevant industry committees and take a key role in discussions and direction setting.</p>
	<p>Review</p> <p>The information is correct as per July 2021. It will be updated when government advice or legislation changes.</p>
